Many of the Tips presented below are covered in greater detail in the Owner's Manual, Multimedia System Manuals, Features and Functions Guide, and Quick-Start Guide hangtag supplied with your new vehicle.

VOICE RECOGNITION AND BLUETOOTH

Using Voice Recognition
Improve Bluetooth Voice Recognition (VR) performance by making a few simple changes to your phone contacts:

- Use full names (first and last names) vs. short or single-syllable names (“John Smith” vs. “Dad,” “Smith Residence” vs. “Home”).
- Avoid using special characters, emojis, and hyphenated names (@, &, #, /, -, *, +, etc.).
- Avoid using acronyms (“Emergency” vs. “ICE” or “In Case of Emergency”) or words with all capital letters.
- Spell words completely; system will not recognize abbreviations (“Doctor Smith” vs. “Dr. Smith”).
- Always wait for the beep before speaking any commands.
- When using VR to place a call, speak in a natural, moderate tone, with clear pronunciation. The system may have trouble recognizing commands if you speak too softly or too loudly.
- Open windows, sunroof, weather (wind/rain), or an A/C fan operating at higher speeds can interfere with VR accuracy.
- Your VR system may have difficulty understanding some accents or uncommon names.
- Press the talk button and say “Help” to get a list of available commands.

Pairing or Connecting Your Phone with Bluetooth

- Press the Phone hard key (if equipped) or “Call” button on the steering wheel to begin the pairing process if no phone has previously been paired.
- During the pairing process, please make sure you accept all requests for phonebook download and future auto-connection on your phone.
- To pair a second phone or subsequent phones, reference the manuals and guides supplied with your Telluride as steps vary by radio.

• Press the Phone hard key (if equipped) or “Call” button on the steering wheel to begin the pairing process if no phone has previously been paired.
• During the pairing process, please make sure you accept all requests for phonebook download and future auto-connection on your phone.
• To pair a second or subsequent phones, refer to the manuals and guides supplied with your Telluride as steps vary by radio.

SMARTPHONE CONNECTIVITY

Apple CarPlay
Your vehicle offers you effortless command of your compatible iPhone when you connect through Apple CarPlay® on your UVO display. This will enable you to make calls, send hands-free texts, access your favorite music and apps, and get navigation help with Siri® voice control.
To connect Apple CarPlay, visit https://youtu.be/N1FQ1VqDt4A.

Android Auto
Your vehicle allows you to connect to your compatible Android phone via Android Auto™ on your UVO display. Through this feature, you can access music, your phone’s dialer, navigation help, and more with an intuitive interface and voice commands. You can even answer your phone through your steering wheel controls.
To connect Android Auto, visit https://youtu.be/QPV7y06-R3A.

2021
REAR OCCUPANT ALERT (ROA) SYSTEM

The ROA system can help alert the driver if the system detects a rear passenger has been left in the vehicle. The 1st alert will be a message on the Instrument Cluster. After the 1st alert, when the doors are locked and there is movement detected in the rear seats, the horn will sound for about 25 seconds.

If you have installed the Kia Access with UVO link app on your smartphone, and logged in and activated the ROA system notification, a third alert (notification) will be sent to your phone.

To turn the system ON or OFF, go to User Settings, select Convenience, then ROA system.

Alerts will only occur if rear doors were opened and closed prior to locking vehicle. If rear doors were never opened, system will not be enabled.

SAFE EXIT ASSIST (SEA) SYSTEM

The SEA system can help prevent passengers from opening their door after your vehicle has stopped when it detects a vehicle approaching from behind by displaying a warning message on the Instrument Cluster and sounding an audible warning.

To turn on the SEA system, go to User Settings menu, select Driver Assistance, then Blind-Spot, and select Safe Exit Assist.

HIGHWAY DRIVING ASSIST (HDA) SYSTEM

The HDA system is designed to automatically adjust the speed of the vehicle to changing speed limits when driving on federal highways based on available highway speed information.

To turn the HDA system on, go to User Settings in the Instrument Cluster. Go to Drive Assistance > Driving Assist > Highway Driving Assist and press the OK button on the Steering Wheel.

The HDA system will operate only when these conditions are met:

- The vehicle is traveling slower than 95 mph.
- When driving on federal highways.
- When the Smart Cruise Control (SCC) is on and operating.
- When the SCC speed is set to current federal highway speed.

When the HDA system is activated and the conditions are met, the Instrument Cluster indicator light will illuminate green. If the conditions are not met, the HDA system will be in standby mode and the indicator light will illuminate white.

When in operation, and if both lanes are recognized, a display will show the lanes illuminated white and the steering wheel indicator illuminated green.

If HDA is activated, conditions are met and the SCC speed is set by the driver (at the posted highway speed limit or slower), the HDA system will enter the automatic speed setting mode. The set speed and AUTO will be displayed in green and an audible alert will sound.

Reminders:

- If the driver changes the speed while in automatic speed setting mode, it deactivates and enters a manual mode.
- When the ignition is cycled, the system returns to its previous state, on or off.

KIA OWNER’S APP WITH UVO LINK

Your cellphone and your vehicle have to be connected to a cellular network with a good wireless signal strength in order to use UVO. If these conditions are not met, remote commands will fail or will take a long time to execute.

- To use Remote Start or Remote Start with Climate Control feature, all doors, hood and trunk/lift-gate must be closed and locked. Remote Start or Remote Start with Climate Control feature will operate for about 10 minutes.
- The quickest way to obtain accurate vehicle status is by pressing a refresh button on your app or customer web portal.
- Activate Remote Start or Remote Start with Climate Control feature at least 10 minutes before you plan to get into the vehicle. This will allow vehicle interior to reach a desired temperature.
- In order to preserve vehicle battery, UVO will not work seven days after the ignition was last turned on. You will need to re-start your vehicle with a key fob in order to use UVO again.

BLIND-SPOT COLLISION AVOIDANCE-REAR (BCA-R)

The BCA-R system uses radar sensors in the rear bumper to help monitor and warn the driver if it detects an approaching vehicle in the driver’s blind spot area. It activates when the vehicle is traveling faster than 20 mph and will alert the driver if another vehicle is detected by the radar sensor.

To activate the BCA-R system, go to User Settings by pressing the Mode button on the Steering Wheel. Select Driver Assistance > Blind Spot Safety and then press the OK button. Select Active Assist, Warning Only, or Off.

To set the initial warning activation time, go to User Settings menu, select Driver Assistance, then Blind-Spot, and select Safe Exit Assist.

1st-stage alert: When another vehicle is detected within the BCA-R system warning boundary, a yellow indicator will illuminate on the outside rearview mirrors.

2nd-stage alert: When 1st stage alert is on and the driver activates a turn signal, a flashing yellow indicator will illuminate on the outside rearview mirrors and the system will sound an alert.

Quick Tip:

- The BCA-R system will activate when:
  - The system is turned ON.
  - The vehicle speed is above approximately 20 mph.
  - Other vehicles are detected on the rear sides of the vehicle.

Reminders:

- The BCA-R system will not issue a warning if the vehicle speed is 6 mph or more above the surrounding vehicles.
- When the BCA-R is ON and the ignition is cycled, the BCA-R system returns to its previous state.
- The BCA-R system is a supplemental system. Do not solely rely on this system. Always pay attention to the road and drive safely.
LANE KEEPING ASSIST (LKA)7

• If the LKA detects that you are moving outside of your lane, the system may give an audible warning and display a Lane Departure Warning (LDW) alert on the instrument cluster. If the vehicle continues to move outside of the lane, the LKA may apply steering inputs, trying to prevent the vehicle from moving outside its lane. LKA is the operating mode by default when the LKA button is depressed to ON. To switch between LKA modes (Lane Keep Assist, Lane Departure Warning), go to User Settings in the instrument cluster.

All systems will operate under the following conditions:
• The vehicle speed exceeds approximately 40 mph.
• The LKA system recognizes both sides of the lane markers the vehicle is traveling in.
• The vehicle is between the lane markers.

Quick Tip: The LKA Warning Volume can be adjusted in the Vehicle Settings on the audio head unit.

USB PORTS, POWER OUTLETS & USB CHARGER

Power Outlets: Use the power outlets for mobile phones and other devices designed to operate on a 12V (180W max.) power outlet.

USB Port: This port is generally used to support media and other files on smart devices or USB sticks, the charge rate is slower than the USB charger port with the battery designation. Third-party USB cables may cause damage to your device.

Warning: Using the power outlets (accessory plugs) for prolonged periods of time with the Engine Start/Stop button in the ACC position (Engine OFF) may cause the battery to discharge. The ISG system is designed to help reduce fuel consumption by automatically shutting down the engine when the vehicle is at a standstill. When the ISG system is ON and the vehicle is at a standstill, the engine will stop and the engine Stop/Start indicator will blink, either on the left or right lane (as shown in both images above) and the ISG button LED is on. Kia recommends that you only use USB cables made by your device's manufacturer. Third-party USB cables may cause damage to your device.

Quick Tip: The power outlets are inactive when the ignition is in the OFF position.

LANE KEEPING ASSIST (LKA)7

• If the AUTO STOP indicator is continuously blinking yellow and the ISG button LED is on, please contact an authorized Kia dealer.
• ISG is active by default at vehicle startup. When ignition is cycled, ISG will turn ON again.
• If FCA-Ped is operating and the ESC (Electronic Stability Control) is turned OFF, FCA-Ped system is automatically turned OFF.
• FCA-Ped/FCW will not operate when the vehicle is traveling faster than approximately 45/50 mph, respectively.
• FCA-Ped/FCW will be activated by default when the ignition is cycled ON, even when the previous setting was OFF.
• When the FCA-Ped system is off, the FCA-Ped warning indicator is on in the Instrument Cluster.
• The USB data port is located next to the power outlets in the center panel charges slower than the USB chargers throughout the vehicle.

Note: The LKA Warning Volume can be adjusted in the Vehicle Settings on the audio head unit.

QUICK TIPS: The USB chargers do not support data transfer.

IDELE, STOP & GO (ISG) SYSTEM

The ISG system is designed to help reduce fuel consumption by automatically shutting down the engine when the vehicle is at a standstill. When the ISG system is ON and the vehicle is at a standstill, the engine will stop and the ISG button LED is on, if you press it again, the system will be activated.

Reminders:
• ISG is active by default at vehicle startup. When ignition is cycled, ISG will turn ON again.
• Ensure the liftgate and all doors are closed and locked. To lock, press the lock button located on driver’s panel, left of the steering wheel.

WARNING: The ISG system is designed to help alert the driver and, under certain conditions, apply emergency braking when rapidly approaching a vehicle that is slowing down, braking, or stopped, or if it detects a pedestrian in front of the vehicle. Initially, FCA-Ped/FCW provides Forward Collision Warning (FCW) when it detects a potential collision with a vehicle or a pedestrian in front, emitting an audible warning and visual alert on the instrument cluster.

The FCA-Ped/FCW system will be activated by default when the LKA button is depressed to ON. If the LKA button is continuously blinking yellow and the ISG button LED is on, please contact an authorized Kia dealer.

FORWARD COLLISION-AVOIDANCE ASSIST–PEDESTRIAN (FCA-PED)7 / FORWARD COLLISION WARNING (FCW)7

The FCA-Ped system is designed to help alert the driver and, under certain conditions, apply emergency braking when rapidly approaching a vehicle that is slowing down, braking, or stopped, or if it detects a pedestrian in front of the vehicle. Initially, FCA-Ped/FCW provides Forward Collision Warning (FCW) when it detects a potential collision with a vehicle or a pedestrian in front, emitting an audible warning and visual alert on the instrument cluster.

Adjust the alert settings (Active Assist, Warning Only, Off) in the User Settings. To turn FCA-Ped/FCW OFF, go to User Settings again and turn OFF.

If the system detects that the collision risk has increased, FCA-Ped can automatically apply the brakes to reduce your speed, potentially helping to minimize the effects of a possible collision. FCA-Ped can be turned ON in the User Settings menu on the Instrument Cluster display.

SMART KEY – REMOTE START

The Smart Key Fob gives you the power to start or stop the engine at the push of a button, or to lock or unlock the doors from outside the vehicle.

To start the engine remotely:
• Ensure the liftgate and all doors are closed and locked. To lock, press the lock button on the remote.
• Hold the START button between 2 to 4 seconds after locking the doors.
• Press A again to cancel the remote engine command.

Note: If unprompted, the engine will run for 10 minutes then automatically turn OFF.
The Smart Power Liftgate can be operated from several controls to either open, close, or lock the Liftgate.

To turn the Smart Power Liftgate features ON, go to User Settings mode in the LCD Instrument Cluster Modes and set to ON.

Opening from Inside the Vehicle: To open the Smart Power Liftgate automatically, press the Liftgate Release button on the exterior of the Liftgate.

Automatically close by pressing the Smart Power Liftgate Close button.

Notes:
- All doors are closed and locked about after 15 seconds.
- The Smart Power Liftgate will not operate when the following occurs:
  - The Smart Key is still detected after 15 seconds near the vehicle or within 60" of the door handles.
  - A door is not locked or closed.
  - Pulling the Liftgate upward by the handle or pressing the button a second time will interrupt the automatic opening of the Smart Power Liftgate.

Power Liftgate Height Adjustment:
For your convenience, the Liftgate opening height is adjustable. To program the opening height, perform the following:
1. Open the Liftgate and manually position the Liftgate to your preferred opening height.
2. Depress and hold the close button on the Liftgate for 3 seconds or more.
3. Once the system sounds the alert that the programming is complete, manually close the Liftgate.

Power Liftgate Opening/Closing Speed Setting:
Go to the User Settings in the Instrument Cluster. Select Door, then Power Liftgate Speed, and select Fast or Normal.

Reminders:
- The default speed is set to fast.
- The speed setting cannot be changed when the Power Liftgate function is turned off or if the Liftgate is not completely closed.

WIPEr SERVICE mode
To inspect or replace the windshield wiper blades and to prevent damaging the hood, the blades need to be moved to the service position.

To return wipers to their normal position, turn the ignition ON, then activate MIST.

To turn the ignition ON, then turn the ignition OFF and within 30 seconds, move the wiper switch up to the MIST position and hold the switch for 2 seconds until the wiper blade is in the full-up position.
