Many of the Tips presented below are covered in greater detail in the Owner’s Manual, Multimedia System Manuals, Features and Functions Guide, and Quick-Start Guide hangtag supplied with your new vehicle.

VOICE RECOGNITION AND BLUETOOTH

Using Voice Recognition

Improve Bluetooth Voice Recognition (VR) performance by making a few simple changes to your phone contacts:

- Use full names (first and last names) vs. short or single-syllable names (“John Smith” vs. “Dad,” “Smith Residence” vs. “Home”).
- Avoid using special characters, emojis, and hyphenated names (@, &, #, /, -, *, +, etc.).
- Avoid using acronyms (“Emergency” vs. “ICE” or “In Case of Emergency”) or words with all capital letters.
- Spell words completely; system will not recognize abbreviations (“Doctor Smith” vs. “Dr. Smith”).
- Always wait for the beep before speaking any commands.
- When using VR to place a call, speak in a natural, moderate tone, with clear pronunciation. The system may have trouble recognizing commands if you speak too softly or too loudly.
- Open windows, sunroof, weather (wind/rain), or an A/C fan operating at higher speeds can interfere with VR accuracy.
- Your VR system may have difficulty understanding some accents or uncommon names.
- Press the talk button and say “Help” to get a list of available commands.

Pairing or Connecting Your Phone with Bluetooth

- Press the Phone hard key (if equipped) or “Call” button on the steering wheel to begin the pairing process if no phone has previously been paired.
- During the pairing process, please make sure you accept all requests for phonebook download and future auto-connection on your phone.
- To pair a second phone or subsequent phones, reference the manuals and guides supplied with your Telluride as steps vary by radio.

Other Bluetooth Tips

- Bluetooth reception is affected by carrier coverage and is dependent on the phone.
- If streaming audio through Bluetooth from a device, ensure the listening volume on the device is turned up.
- Phone operating systems change frequently and some phones may have varying compatibility levels with the Bluetooth system. For any questions regarding the features of your vehicle, please contact your preferred Kia dealer or contact Kia Consumer Assistance at 1-800-333-4542.

SMARTPHONE CONNECTIVITY

Apple CarPlay

Your vehicle offers you effortless command of your compatible iPhone® when you connect through Apple CarPlay® on your UVO display. This will enable you to make calls, send hands-free texts, access your favorite music and apps, and get navigation help with Siri® voice control.

To connect Apple CarPlay, visit https://youtu.be/NlTQ1WjB0RA.

Android Auto

Your vehicle allows you to connect to your compatible Android™ phone via Android Auto™ on your UVO display. Through this feature, you can access music, your phone’s dialer, navigation help, and more with an intuitive interface and voice commands. You can even answer your phone through your steering wheel controls.

To connect Android Auto, visit https://youtu.be/QPV7y06-R3A.
The BCA-R system can help alert the driver if the system detects a rear passenger has been left in the vehicle. The 1st alert will be a message on the Instrument Cluster. After the 1st alert, when the doors are locked and there is movement detected in the rear seats, the horn will sound for about 25 seconds. If you have installed the Kia Access with UVO link app on your smartphone, and logged in and activated the RDA system notification, a third alert (notification) will be sent to your phone.

To turn the system ON or OFF, go to User Settings, select Convenience, then RDA system. Alerts will only occur if rear doors were opened and closed prior to locking vehicle. If rear doors were never opened, system will not be enabled.

SAFE EXIT ASSIST (SEA) SYSTEM

The SEA system can help prevent passengers from opening their door after your vehicle has stopped when it detects a vehicle approaching from behind by displaying a warning message on the Instrument Cluster and sounding an audible warning.

To turn on the SEA system, go to User Settings menu, select Driver Assistance, then Blind-Spot, and select Safe Exit Assist. 

HIGHWAY DRIVING ASSIST (HDA) SYSTEM

The HDA system is designed to automatically adjust the speed of the vehicle to changing speed limits when driving on federal highways based on available highway speed information.

To turn the HDA system on, go to User Settings in the Instrument Cluster. Go to Drive Assistance > Driving Assist > Highway Driving Assist and press the OK button on the Steering Wheel.

The HDA system will operate only when these conditions are met:
- The vehicle is traveling slower than 95 mph.
- When driving on federal highways.
- When the Smart Cruise Control (SCC) is on and operating.
- When the SCC speed is set to current federal highway speed.
- When the HDA system is activated and the conditions are met, the Instrument Cluster indicator light will illuminate green. If the conditions are not met, the HDA system will be in standby mode and the indicator light will illuminate white.
- When in operation, and if both lanes are recognized, a display will show the lanes illuminated white and the steering wheel indicator illuminated green.
- If HDA is activated, conditions are met and the SCC speed is set by the driver (at the posted highway speed limit or slower), the HDA system will enter the automatic speed setting mode. The set speed and AUTO will be displayed in green and an audible alert will sound.
- In order to preserve vehicle battery, UVO will not work seven days after the ignition was last turned on. You will need to re-start your vehicle with a key fob in order to use UVO again.

KIA OWNER’S APP WITH UVO LINK

BLIND-SPOT COLLISION AVOIDANCE-REAR (BCA-R)

The BCA-R system uses radar sensors in the rear bumper to help monitor and warn the driver if it detects an approaching vehicle in the driver’s blind spot area. It activates when the vehicle is traveling faster than 20 mph and will alert the driver if another vehicle is detected by the radar sensor.

To activate the BCA-R system, go to User Settings by pressing the Mode button on the Steering Wheel. Select Driver Assistance > Blind Spot Safety and then press the OK button. Select Active Assist, Warning Only, or Off.

Quick Tip:
- The BCA-R system will activate when:
  - The system is turned ON.
  - The vehicle speed is above approximately 20 mph.
  - Other vehicles are detected on the rear sides of the vehicle.

Reminders:
- Other vehicles are detected on the rear sides of the vehicle.
- The vehicle speed is above approximately 20 mph.
- When the BCA-R system has turned OFF, the BCA-R system will not issue a warning if the vehicle speed is 6 mph or more above the surrounding vehicles.
- When the BCA-R system is OFF and the ignition is turned OFF, the BCA-R system returns to its previous state.
- The BCA-R system is a supplemental system. Do not solely rely on this system. Always pay attention to the road and drive safely.
Reminders:

- SMART KEY – REMOTE START
- IDLE, STOP & GO (ISG) SYSTEM
- USB PORTS, POWER OUTLETS & USB CHARGER
- LANE KEEPING ASSIST (LKA)

Warning:

- Do not solely rely on the systems and always drive safely.

Power Outlets: Use the power outlets for mobile phones and other devices designed to operate on a 12V (180W max.) power outlet.

USB Port: This port is generally used to support media and other files on smart devices or USB sticks; the charge rate is slower than the USB charge port with the battery designation. This port is used for the charging of devices only, and is considered a fast charge port and requires a USB cable. The Engine Start/Stop button needs to be in the ACC/ON/Start position to operate the USB Charger.

Reminders:

- Using the power outlets (accessory plugs) for prolonged periods of time with the Engine Start/Stop button in the OFF position (Engine OFF) may cause the battery to discharge.
- The power outlets are inactive when the ignition is in the OFF position.
- The USB port in the center panel charges slower than the USB chargers throughout the vehicle.

Quick Tips:

- The power outlets are inactive when the ignition is in the OFF position.
- The USB data port is located next to the power outlets. The USB charger does not support data transfer.

The ISG system is designed to help reduce fuel consumption by automatically shutting down the engine when the vehicle is at a standstill.

When the ISG system is ON and the vehicle is at a standstill, the engine will start and the AUTO STOP indicator on the instrument cluster will illuminate green.

The engine will restart when the brake pedal is released or the shift lever is moved from the D (Drive) to the R (Reverse) position or to Manual Shift mode. When the engine restarts, the green AUTO STOP indicator on the instrument cluster will turn off.

To deactivate the ISG system, press the ISG OFF button. If you press it again, the system will be reactivated.

Reminders:

- ISG is active by default at vehicle startup. When ignition is cycled, ISG will turn on again.
- Under certain conditions, the engine will restart if the ignition is turned OFF.
- If the ISG system does not meet the operating conditions outlined in the Owner’s Manual, it will deactivate; the ISG OFF button will illuminate yellow.

The FCA-Ped system is designed to help alert the driver and, under certain conditions, apply emergency braking when rapidly approaching a vehicle that is slowing down, braking, or stopped, or if it detects a pedestrian in front of the vehicle. Initially, FCA-Ped provides Forward Collision Warning (FCW) when it detects a potential collision with a vehicle or a pedestrian in front, emitting an audible warning and visual alert on the instrument cluster.

Adjust the alert settings (Active Assist, Warning Only, Off) in the User Settings menu on the Instrument Cluster display.

FCA-Ped/FCW will become active when the: Engine Start/Stop button is ON. Vehicle is traveling faster than 5 mph. Electronic Stability Control (ESC) is ON.

If the system detects that the collision risk has increased, FCA-Ped can automatically apply the brakes to reduce your speed, potentially helping to minimize the effects of a possible collision. FCA-Ped can be turned ON in the User Settings menu on the Instrument Cluster display.

FCA-Ped/FCW will be deactivated by default when the ignition is cycled ON, even when the previous setting was OFF.

If FCA-Ped/FCW will not operate when the vehicle is traveling faster than approximately 45/50 mph, respectively.

If FCA-Ped is operating and the ESC (Electronic Stability Control) is turned OFF, FCA-Ped system is automatically turned OFF.

When the FCA-Ped system is off, the FCA-Ped warning indicator is on in the Instrument Cluster.

Warning: FCA-Ped and FCW are supplemental systems. Never intentionally attempt to activate or test the operation of the systems. Do not rely solely on the systems and always drive safely.

USB PORTS, POWER OUTLETS & USB CHARGER

FCA-Ped/FCW Off, go to User Settings again and turn OFF.

SMART KEY – REMOTE START

With the Engine Start/Stop button in the ON position, press the LKA button to turn the system ON or OFF. Once ON, the instrument cluster indicator will illuminate yellow. It will remain white when the vehicle is traveling slower than 40 mph or when the system does not detect the lane markers. When the system detects the lane markers and can assist the steering, the LKA icon will illuminate green.

If the LKA detects that you are moving outside of your lane, the system may give an audible warning and display a Lane Departure Warning (LDW) alert on the instrument cluster. If the vehicle continues to move outside of the lane, Kia may apply steering inputs, trying to prevent the vehicle from moving outside its lane. LKA is the operating mode by default when the LKA button is depressed to ON. To switch between LKA modes (Lane Keep Assist, Lane Departure Warning), go to User Settings in the instrument cluster.

All systems will operate under the following conditions:

- The vehicle speed exceeds approximately 40 mph.
- The LKA system recognizes both sides of the lane markers the vehicle is traveling in.
- The vehicle is between the lane markers.

Quick Tip:

- The LKA Warning Volume can be adjusted in the Vehicle Settings on the audio head unit.

FORWARD COLLISION-AVOIDANCE ASSIST–PEDESTRIAN (FCA-PED) / FORWARD COLLISION WARNING (FCW)

The FCA-Ped system is designed to help alert the driver and, under certain conditions, apply emergency braking when rapidly approaching a vehicle that is slowing down, braking, or stopped, or if it detects a pedestrian in front of the vehicle. Initially, FCA-Ped provides Forward Collision Warning (FCW) when it detects a potential collision with a vehicle or a pedestrian in front, emitting an audible warning and visual alert on the instrument cluster.

Adjust the alert settings (Active Assist, Warning Only, Off) in the User Settings menu on the Instrument Cluster display.

FCA-Ped/FCW will become active when the: Engine Start/Stop button is ON. Vehicle is traveling faster than 5 mph. Electronic Stability Control (ESC) is ON.

If the system detects that the collision risk has increased, FCA-Ped can automatically apply the brakes to reduce your speed, potentially helping to minimize the effects of a possible collision. FCA-Ped can be turned ON in the User Settings menu on the Instrument Cluster display.

FCA-Ped/FCW will be deactivated by default when the ignition is cycled ON, even when the previous setting was OFF.

If FCA-Ped/FCW will not operate when the vehicle is traveling faster than approximately 45/50 mph, respectively.

If FCA-Ped is operating and the ESC (Electronic Stability Control) is turned OFF, FCA-Ped system is automatically turned OFF.

When the FCA-Ped system is off, the FCA-Ped warning indicator is on in the Instrument Cluster.

Warning: FCA-Ped and FCW are supplemental systems. Never intentionally attempt to activate or test the operation of the systems. Do not rely solely on the systems and always drive safely.

SMART KEY – REMOTE START

The Smart Key Fob gives you the power to start or stop the engine at the push of a button, or to lock or unlock the doors from outside the vehicle.

To start the engine remotely:

- Ensure the liftgate and all doors are closed and locked. To lock, press the lock button on the remote.
- Hold the START button between 2 to 4 seconds after locking the doors.
- Press again to cancel the remote engine command.

Note: If unprompted, the engine will run for 10 minutes then automatically turn OFF.
Go to the User Settings in the Instrument Cluster. Select Door, then Power Liftgate Speed Setting: 2. Depress and hold the close button on the Liftgate for 3 seconds or more. 3. Once the system sounds the alert that the programming is complete, manually close the Liftgate.

For your convenience, the Liftgate opening height is adjustable. To program the opening height, perform the following:

1. Open the Liftgate and manually position the Liftgate to your preferred opening height. 2. Depress and hold the close button on the Liftgate for 3 seconds or more. 3. Once the system sounds the alert that the programming is complete, manually close the Liftgate.

Power Liftgate Opening/Closing Speed Setting:

Go to the User Settings in the Instrument Cluster. Select Door, then Power Liftgate Speed, and select Fast or Normal.

Quick Tip:

The speed setting cannot be changed when the Power Liftgate function is turned off or if the Liftgate is not completely closed.

• The speed setting cannot be changed when the Power Liftgate function is turned off or if the Liftgate is not completely closed.

To inspect or replace the windshield wiper blades and to prevent damaging the hood, the wiper blade is in the fully up position.

The Smart Power Liftgate feature is OFF by default. To enable the Smart Power Liftgate, press the Smart Power Liftgate button.

The default speed is set to fast. The speed setting cannot be changed when the Power Liftgate function is turned off or if the Liftgate is not completely closed.

The Smart Power Liftgate can be deactivated with the Smart Key by pressing any button on the key fob.

When the Smart Key fob is on your person and you are near the back of the vehicle, within close proximity, the hazard lights will blink and a chime will sound for about 3 seconds as an alert that the Smart Power Liftgate is about to open.

Then the alert system will blink and chime two additional times before opening the Smart Power Liftgate.

The Smart Power Liftgate feature is OFF by default. To enable the Smart Power Liftgate, press the Smart Power Liftgate button.

When theSmart Key fob is on your person and you are near the back of the vehicle, within close proximity, the hazard lights will blink and a chime will sound for about 3 seconds as an alert that the Smart Power Liftgate is about to open.

The Smart Power Liftgate feature is OFF by default. To enable the Smart Power Liftgate, press the Smart Power Liftgate button.

When the Smart Key fob is on your person and you are near the back of the vehicle, within close proximity, the hazard lights will blink and a chime will sound for about 3 seconds as an alert that the Smart Power Liftgate is about to open.

Then the alert system will blink and chime two additional times before opening the Smart Power Liftgate.
